    Keywords: CODES TORAH KABBALAH COMPUTER NUMEROLOGY

    Here is a sampling of words hidden in the Torah, transliterated, with key,
    for easy understanding. Some of these are recently discovered by the
    computer study currently being done in Israel; others come to us from the
    Kabbalistic sources. All are interesting. Questions? Comm: Ari Schachter

A SAMPLING OF HIDDEN CODES IN THE TORAH
=======================================

Here is a sampling of some of the hidden words in the Torah. Since the
Hebrew cannot be uploaded, the transliteration is as follows:

Aleph  = A     Bet  = B     Gimel = G    Dalet = D    Hey = H      Vav = V
Zayin  = Z     Chet = Kh    Tet   = T    Yod   = Y    Kaf = Ch  Kaf Sofit = Ch:
Lamed  = L     Mem  = M  Mem Sofit = M:  Nun   = N              Nun Sofit = N:
Samech = $     Ayin = E     Pei = P      Phei  = Ph             Phei Sofit = Ph:
Tzadi  = Tz    Kuf  = Q     Reish = R     Shin = Sh  Sin = S     Tav = Th

The chart below works as follows:
    The first column is the hidden word. Second column is the location of the
starting letter. The third column is the word in the sentence which "houses"
the starting letter of the hidden word. The letter enclosed <X> is the first
letter of the hidden word. If the housing word appears more than once in the
same sentence, the number of the correct word appears here in parentheses.
The fourth column indicates spacing, i.e., 49 indicates there are 49 letters
BETWEEN the letters of the hidden word. An "R" in the fifth column indicates
the hidden word is spelled out in reverse. The last column is just a trans-
literation of the first column for ease of comprehension.

1) "ABRHM" begins with the Aleph <A> of ALHYM and ends about 250 letters later
   on the Mem <M> of ALHYM.
2) Note the section of Torah this word is embedded in.
3) Rambam appears as the initial letters of "Rabos Mofsai B'eretz Mitzrayim.
   If one begins in the same pasuk on the Mem of Moshe, the Word "Mishneh" is
   spelled out. If one starts at the same Mem and counts 613 letters, one then
   reaches a Tav, which is the first letter of the hidden word "Torah", thus
   completing Mishneh Torah, Rambam's famous work about the 613 Mitzvos.
