RE:Recommendation for Stan Tenen

To whom it may concern:

I have been following Stan's work for two decades. He has made crucial discoveries on the history of the alphabet, the deeper levels of meaning of sacred texts, and the role of mathematics in the history of consciousness.

His research on the role of the torus and the mudras hidden in ancient texts is revolutionary.

In my opinion, he is among the most important students of Kabbalah of recent times. I cannot recommend his work too highly.

Sincerely yours,
